PROFILE

AI Engineer with a strong interest in Generative AI, intelligent automation, and enterprise AI applications. Adept at translating complex business requirements into practical AI solutions and committed to continuous learning in the rapidly evolving AI landscape. Seeking full-time opportunities to build innovative products that create measurable business value.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Knowledgeflex Technologies PVT LTD

AI Engineer Intern · Full-time

12/2025 – 06/2026
Bengaluru

- Architected and deployed a production-grade AI meeting management platform on **Azure**, actively used by 4-6 team members and processing **25–30 meetings** per week.
- Replaced paid third-party SaaS solutions with a cost-efficient in-house stack (Deepgram, Whisper Turbo, Llama, Gemini 2.5 Pro), **eliminating recurring SaaS subscription costs entirely**.
- Built end-to-end microservices for transcription, summarization, task tracking, and scheduling, exposed through **Microsoft Graph APIs** and **REST APIs**, integrated into a React.js frontend with a secure **Node.js/Express.js** backend — enabling native **Outlook calendar** and **Microsoft Teams meetings**.
- Developed **RAG pipelines** with vector database retrieval and multi-model LLM inference to extract meeting decisions, action items, and summaries in real time, eliminating manual note-taking.
- Containerized services using **Docker** and independently managed **Azure cloud deployment**, delivering a scalable, production-ready infrastructure from development through production.

Daali Production(Film Industry)

Prompt Engineer Intern · Full-time

05/2024 – 03/2025
Bengaluru

- Designed and fine-tuned prompts for **GPT, DALL-E, MidJourney**, and **Stable Diffusion** models to produce high-quality creative media assets.
- Conducted **LoRA training** to optimize AI models for specialized creative media use cases, improving output consistency and style fidelity.
- Leveraged **Hugging Face tools** and **pipelines** to accelerate AI-driven content creation workflows for film production.

ContentEase.Ai

Software Developer Intern

11/2023 – 07/2024
Bengaluru

- Developed end-to-end **RAG pipelines** using **FAISS, Chroma**, and **Pinecone**, significantly enhancing retrieval accuracy and contextual reasoning for enterprise applications.
- Engineered LLM-based function calling workflows to automate structured and reliable responses in production systems.
- Fine-tuned **YOLO models** for specialized computer vision use cases, boosting detection accuracy for niche business workflows.
- Implemented **CI/CD pipelines** to automate testing and deployment, reducing release cycles and improving delivery reliability.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, SQL, Golang
- AI / ML Frameworks:** LangChain, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
- LLMs & APIs:** OpenAI API, Hugging Face Inference API
- AI Techniques:** RAG, Prompt Engineering, Multi-Agent Architectures, NLP, Text Summarization, LoRA Training, Generative AI
- Web Frameworks:** FastAPI, Flask, Django, React.js, Node.js, Express.js
- Cloud & DevOps:** Azure, Docker, CI/CD Pipelines
- Databases & Vector Stores:** FAISS, Chroma, Pinecone, MySQL, PostgreSQL
- Web Technologies:** HTML, CSS, Vue.js, WordPress, Shopify

EDUCATION

Master of Computer Applications

Dayananda Sagar College Of Engineering

8.3 CGPA

2022 – 2024
Bengaluru, India

Bachelor of Computer Applications

RNS First Grade College

7.4 CGPA

2019 – 2022
Bengaluru, India

ACADEMIC PROJECTS

MCA

YouTube Summarizer

Built a web application enabling users to input YouTube video links and receive instant AI-generated summaries using **NLP libraries** including **Gensim**, **spaCy**, and **NLTK**. Focused on extractive summarization

Multimodal Content Generation Using LLMs

Developed an **AI assistant** capable of generating both text and images using **Gemini Vision Pro**, **Stable Diffusion**, and **Hugging Face models**. Integrated multiple modalities into a unified interface for creative content generation

BCA

Covid Testing And Management

Designed and implemented a desktop application to automate **COVID test records** and **migration permit management** using **VB.NET** and **MySQL**, reducing manual administrative overhead.
